REPORT OF SUPERINTENDENT OF SCHOOLS.

To the School Board and Citizens:

I herewith submit my ninth annual report of the schools of Bow for the year ending June 30, 1928.

There were maintained during the year, seven schools, for a school-year of 36 weeks, with no change in the teaching force.

The total school enrollment was 139 (69 boys and 70 girls), with a daily average attendance of 93.18 per cent.

The schools were in session on an average 346.86 half-days.

The school attendance was good. Most of the absences were caused by sickness.

The cases of truancy were confined to a few families, who gave as a reason their inability to provide proper clothing.

The School Laws of New Hampshire, Chapter 117: "The School Board of every district shall provide standard elementary schools for at least thirty-six weeks in each year at such places in the district as will best serve the interests of education and give to all the pupils within the district as nearly equal advantages as are practicable."

The school authorities have endeavored to so arrange the school calendar that this law may be carried out, and are constantly studying methods of improving the work done in our schools, and ways and means of eliminating waste in the expenditure of effort and money.

Some rural schools are becoming so small that the cost per pupil is more than double the cost per pupil in the village schools and the educational advantages not as good.

The School Board now, as in times past, hesitates to close a small school and transport the pupils as long as there is a reasonable prospect of an increase in the number of pupils large enough to warrant keeping the school open.

The rural school, with the great decrease in rural population, presents a serious problem. This decrease is taking place not only in New Hampshire but in every state in the Union.
